

In the Specification

Please amend paragraph 0008 as follows:

[0008] Coil 126 is retained within chamber 112 by pins 128 which are shown extending through sidewalls of the coil and also through sidewalls 114 of chamber 112. Pins 128 are retained within retaining screws 132 in the shown configuration. The schematic illustration of Fig. 1 shows heads 130 of the pins along the exterior surface of chamber sidewalls 114 ~~along an interior surface of coil 126~~, and another set of heads 132 of the retaining screws 132 along an interior surface of coil 126 ~~along the exterior surface of chamber sidewalls 114~~.
